T & E AND CULTURAL RESOURCES NOTICE TO APPLICANTS

Prior to approval of any application, all applicants requesting permission to conduct any project or activity on state trust land must acknowledge receipt and acceptance of the following instruction and notification:

Lessees are expected to know and abide by the laws related both to threatened and endangered species, and to the protection of cultural properties.

Threatened and Endangered Species

Plant and animal species may be listed with various state and federal agencies as threatened or endangered. Each agency designation carries specific prohibitions against “take” which may result in distinct regulatory impacts on land use within the range of each species. “Take” is defined and interpreted differently across jurisdictional boundaries. It is the lessee’s obligation to know, understand and abide by the laws related to threatened and endangered species.

Protection of Cultural Resources

The New Mexico Historic Preservation Division maintains records of all cultural resource surveys through its Archaeological Records Management Section (ARMS). An ARMS Inspection of Records in compliance with NMAC 4.10.15.9 will be included with all applications.

To minimize processing delays, applicants are strongly encouraged to supply an ARMS Inspection with their applications. If no ARMS Inspection is provided by the applicant, the land Office will provide the ARMS Inspection in the order applications are received.

NMSA 1978, § 18-6-9(A) states “Any person who knowingly excavates, injures or destroys cultural property located on state land without a permit is guilty of criminal damage to property.” Further, NMSA 1978, § 18-6-9(B) states “Any person who solicits, employs or counsels another person to excavate, injure or destroy cultural property located on state land without a permit is guilty of criminal damage to property.”

Applicants and lessees should always exercise due caution to ensure that cultural properties are not inadvertently excavated, injured or destroyed by any person. The State Land Office recommends that a survey be conducted to current standards, as defined by NMAC 4.10.15, prior to any activity in the proposed project area. If a survey is produced in conjunction
