POLICY ON COMMUNICATIONS REGARDING OIL & GAS LEASE SALE NOMINATIONS

Because the listing of oil & gas lease tracts to be offered for bid is neither finalized nor public prior to publication, the State Land Office will not provide notification of whether submitted or internal nominations will be included in a lease sale prior to publication. Acknowledgement of receipt of nominations does not constitute a notification that such nominations will or will not be included in a lease sale. Notification of inclusion is the monthly published lease sale listing itself.

To nominate, submit a locational description of the nominated tract to amarks@slo.state.nm.us and pczoski@slo.state.nm.us. To be considered for the next month's lease sale, nominations must be submitted two Fridays before the current month's lease sale date. Lease sales are held the third Tuesday of each month.

If a nominated tract is included in a lease sale, the nominator must ensure that at least a minimum bid is submitted for the nominated tract. If no minimum bid is submitted, future nominations from the nominator may be rejected.

CONSERVATION EASEMENTS (CCAA)

In 2012, the New Mexico State Land Office entered into a Candidate Conservation Agreement with Assurances (CCAA) with the United States Fish and Wildlife Service (USFWS) and the Center of Excellence for Hazardous Material Management (CEHMM). The agreement was expanded in 2014.

The Purpose of the CCAA is to provide protections for the Lesser Prairie Chicken and Dunes Sagebrush Lizard, while allowing industry activities to continue on State Lands. There are now 404,000 acres of State Lands enrolled in the program.

By enrolling State Lands, the New Mexico State Land Office has provided for program eligibility for lease holders on these lands. Enrolled lands are marked on the oil & gas lease sale tract listing with a footnote.

This is a voluntary program entered into by industry through CEHMM and is still open for entry for new leases despite the recent listing of the LPC as endangered. Information on the program can be found at the CEHMM website: <https://www.cehmm.org/conservation-programs>

Cultural Properties Protection Rule

The State Land Office has adopted a new administrative rule, the Cultural Properties Protection Rule (19.2.24 NMAC) to protect cultural properties on state trust lands, which will take effect on December 1, 2022. The purpose of the new Rule is to proactively identify archaeological sites and other cultural properties on state trust lands and protect them before they are damaged. The Rule requires lessees of state trust lands to conduct informational reviews and cultural resource surveys before engaging in new surface disturbing activities.

The Rule provides for important exceptions, including repairs and maintenance of existing improvements, and for surface disturbing activities that are located entirely within an area of pre-existing disturbance (for example, a new well drilled within the confines of an extant well pad, or remediation and reclamation of a contaminated well pad).

The State Land Office's recently launched Cultural Resources Office will manage implementation of the Rule, along with the agency's leasing divisions. The text of the new Rule is available on the State Land Office's website at <https://www.nmstatelands.org/culturalproperties/>. For questions about the Rule including what steps lessees need to take and at what stage of the leasing process in order to be in compliance with the Rule, please contact croinfo@slo.state.nm.us.

CALICHE PITS ON OIL & GAS LEASES

FROM SLO MINERALS RULE 5:

19.2.5.11 USE OF NECESSARILY DISTURVED CALICHE FROM OIL AND GAS LEASE ACERAGE.

The commissioner shall make no charge for caliche necessarily moved within roadbed or within the perimeter of a specific well pad while in the process of developing oil and natural gas under a state oil and gas lease, subject to the following conditions.

- A. Only caliche derived from the cellar and reserve pit or cut and fill, which is necessarily disturbed in the process of building an access road and/or that oil and gas well location, may be used without charge.
- B. Caliche necessarily distributed during construction must remain within the boundaries of the oil and gas lease. If excess caliche exists from a necessary disturbance, that caliche may only be moved from that location to another well site within the lease once an operator or lessee of record obtains a permit and compensates the commissioner pursuant to the terms of a community caliche pit permit.
- C. Only caliche excavated during cut and fill construction of a well pad or roads built to 19.2.20 NMAC standards will be considered necessarily disturbed.
- D. [5/14/99; 19.2.5.11 NMAC – Rn, 19 NMAC 3. SLO 5.11 09/30/02]
